

# Newstore-X

## DESIGNED SPECIFICALLY FOR NEWS PRODUCTION

### OVERVIEW

- Instantly at your fingertips all the video elements needed for a competitive Newscast
- Newstore-X is a **Video Server, Still-Clip store, dual Channel DVE** and **multiple keyers** system
- Newstore-X not only provides "Fill & Key" outputs to a production switcher but its powerful **internal keying** system means fewer M/E's, DSK's and DVE options are needed in a **new digital switcher**
- **Ex: OTS "Gas prices"** has two layers of keying, OTS Clip & Still, but uses only one "fill & key" pair
- **Ex: "Boxes"** has a background clip and two live feeds but uses only **one video output channel**
- **Breaking News** and "End Credits" Promo. Evening/week-end staff push just one button to go to Air
- **Bumps** using Linear Key transitions instead of simple cuts produce a very competitive look
- The SD-SDI model is field upgradeable to HD when you need it.
- Powerful DB for fast retrieval of stored media and on-line archiving.
- **Robust IT server hardware:** 2 TB RAID-5 standard up to 5TB optional.
- Hot swap drives, fans & redundant P/S's.
- Giga-Net Ethernet for fast media file transfers from most popular **NLE's**
- Two Quad Core Intel Xeon processors
